Select item on Pause Menu	Enter
Navigate Pause Menu	W, A, S, D, Arrow Keys
Reset Game	R
Move Room Up	I
Move Room Down	K
Move Room Left	J
Move Room Right	L

Known bugs:

- After Link has used all of the keys he's collected it still appears in the HUD that he has one, but he still can't open locked doors (i.e. just a HUD bug, not an inventory bug)

Details of tools/processes we used that aren't explicitly required:

- **(Sprint 4)** Created custom texture atlas from scratch in Procreate for the last 10 frames of Link's death animation
- (Sprint 3) Movement between rooms in order using the doors has been implemented.
- (Sprint 2) Created custom texture atlases for Link, the items he uses, and the projectiles/effects he produces from using those items (swords, bombs, arrows). Used Paint, GIMP, and Procreate (iPad app) for image-editing software.

Other Notes:

- None
